

Statement of Work: Jhaveri + Leydon, Epicore Biosystems

Design Services:

A contextually appropriate mix of prior-art review, competitive analysis, user research, visualization design, UX/interaction design, wireframes & mockups, diagramming, critiques, brainstorming, presentation, and/or written description.

Compensation:

\$125.00 / hour for services rendered, on a time and materials basis, invoiced monthly. Payment due within 30 days of invoice. If unpaid, work will pause until payment is made. As requested, Epicore Biosystems will be informed by email when approaching the following thresholds: \$2,000.00, \$4,000.00, \$6,000.00, and \$7,000.00.

Compensation will include the right to visually present an agreed-upon subset of our design work in the context of our portfolios/presentations/resumes, based on written approval by an Officer of Epicore Biosystems.

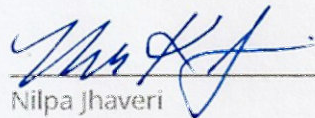

Collaboration, Deliverables:

Initially, we anticipate more intense collaboration, followed by more independent investigation/design work, with communication/presentation as needed. We will endeavor to make design artifacts available and visible, as we are working (probably via Figma). Deliverables will include wireframes (at a minimum of three iterations) conveying design intent, and probably interactive "click-through" wireframe prototypes, in support of graphic design and implementation. Additional / ongoing scope to be captured via follow-up addenda to this Statement of Work, as "Additional Services".

Timeframe / Caps:

Assuming 3 months to start, with a \$7,000.00 cap (whichever occurs first), at which point next steps can be assessed.

Intensity: Assuming 20 hours/week to start.
